Pragati Dilip Gunai

Farmington Hills, MI | (947) 201-9759 | pragatig@umich.edu | linkedin.com/in/pragati-gunai/ Portfolio

SUMMARY

Detail-oriented and results-driven Web Developer with over 4 years of experience designing, developing, and maintaining dynamic web applications using modern technologies including WordPress, PHP, JavaScript, and cloud services like AWS. Adept at creating responsive, user-centric websites with a strong emphasis on performance, SEO, and security. Experienced in both frontend and backend development, CMS customization, API integrations, and agile team collaboration. Proven ability to deliver high-quality digital solutions in fast-paced environments.

EDUCATION

Maters in Computer Information & Science | University of Michigan, MI **01/2023 - 04/2024**
Bachelor's in computer engineering | University of Mumbai, India **05/2015 - 06/2018**

TECHNICAL SKILLS & TOOLS

- **Web Technologies:** WordPress, PHP, HTML5, CSS3, JavaScript, jQuery, Bootstrap, XML, JSON, RESTful APIs, AJAX, C#.
- **CMS Platforms:** Shopify, Sitefinity, Laravel (basic knowledge)
- **Database Management:** MySQL, NoSQL, XAMPP, Oracel.
- **Tools & Platforms:** Visual Studio, GitHub, Azure, AWS, Jira, CI/CD, AWS, CI/CD, Docker.
- **SEO & Performance Optimization:** Experienced in web analytics, SEO best practices, and performance tuning.

WORK EXPERIENCE

Software Developer | University of Michigan **Dearborn, USA | 01/2024 - 09/2025**

- Develop and maintain web applications for research data collection and visualization, utilizing WordPress for rapid content management and plugin-based functionality.
- Optimize front-end and back-end systems using HTML, CSS, JavaScript, PHP, and Angular, with custom WordPress themes and short codes to enhance UI components and data display modules.
- Implement and manage WordPress-based portals for internal research collaboration, enabling secure access to datasets, publications, and submission forms.
- Integrate research data with SQL databases, Web APIs, and university systems while ensuring compliance with institutional security policies and accessibility standards.
- Develop custom WordPress plugins to automate data entry workflows and generate real-time visualizations for research.
- Implement AI-powered analytics modules within WordPress environments, enhancing insight delivery through dynamic charts and personalized reports.
- Leverage AWS services to host WordPress applications with scalable architecture and cost-effective resource management.
- Conduct performance testing, troubleshoot issues across WordPress and custom-coded systems, and enhance application scalability and reliability.
- Provide detailed technical documentation, user guides, and training sessions for research teams, improving platform usability and cross-functional efficiency.

Web Devloper | Paktolus Solution LLC **Mumbai, India | 11/2021 - 11/2022**

- Developed and maintained dynamic insurance-focused web platforms using WordPress, Shopify, and a modern tech stack (PHP, JavaScript, React, Angular, Bootstrap), driving a measurable increase in user engagement and client satisfaction
- Designed and implemented custom WordPress themes and plugins to streamline policy management and claims processing workflows, driving a 25% improvement in operational efficiency.
- Integrated WooCommerce for handling online service subscriptions, including secure payment gateway setup and plugin.
- Worked closely with stakeholders to define user experience goals and translated them into scalable web solutions.
- Integrated RESTful APIs and AWS services (Lambda, API Gateway, S3) to support real-time policy updates and claims tracking, ensuring seamless and efficient service delivery.
- Collaborated on front-end development using Bootstrap, Angular, and React, delivering responsive and dynamic user interfaces that guarantee a smooth experience across various devices and platforms.
- Optimized database performance by implementing MySQL to improve data storage and retrieval, achieving a 40% reduction in query response times.
- Led Agile development processes and ensured cross-browser compatibility, significantly boosting overall site performance, reliability, and security.

Web Developer | Jain Investment Pvt. Ltd. **Mumbai, India | 08/2019 - 11/2021**

- Built and maintained financial portfolio websites using WordPress, PHP, Angular, React, Bootstrap, HTML, CSS, and JavaScript, increasing user engagement by 20%.
- Implemented custom email templates with AJAX-driven verification features, boosting lead conversion rates by 30%.
- Integrated MySQL databases and APIs for real-time data access, enhancing site responsiveness and reducing load times by 35%.
- Developed client-side validation and robust security measures, reducing validation errors by 40% and ensuring secure financial transactions.
- Applied SEO and web analytics tools to improve site performance and search rankings, leading to a 15% traffic increase.

UNIVERSITY PROJECTS

Attendance Management System (WordPress Plugin)

- Developed a custom WordPress plugin to manage student/employee attendance with role-based access for admins, teachers, and students.
- Enabled session-wise attendance tracking, report generation, and email notifications using the WordPress REST API and custom post types.
- Designed an intuitive admin panel with real-time visualizations of attendance data using Chart.js.

Library Management System

- Created a library portal on WordPress to manage books, borrowers, and loan records using custom post types and search/filter functionality.
- Implemented book issuance/return system with member login, due date alerts, and optional barcode generation.
- Developed a backend management dashboard for librarians to track overdue books and automate fine calculations.

Healthcare Appointment Booking System

- Built a doctor-patient appointment scheduling system on WordPress with frontend booking forms and dynamic time-slot management.
- Integrated patient dashboards, medical history tracking, and automated email/SMS reminders using Twilio and WP hooks.
- Allowed doctors to manage availability and access appointment history through secure role-based dashboards.

Credit Card Fraud System

- Engineered a Credit Card Fraud Detection System in Python, harnessing machine learning algorithms.
- Instituted real-time monitoring and alerting, diminishing financial losses by 70% through prompt detection and response to suspicious activities. Ensured customer trust and satisfaction by identifying and preventing 95% of fraudulent transactions.

CERTIFICATIONS AND PUBLICATIONS

- Accredited with certifications in HTML, CSS, Bootstrap and PHP from Duke Institute.
- Recognized for publishing a project in an IEEE research paper.
- Certification of Participation – WordPress Development Workshop.
